- b. Create description list as followed:

We promote the basic design concepts:

1. **Contrast**
Size, color, weight, opacity, etc
Creates a hierarchy of importance
2. **Repetition**
Repeat similar elements (colors, shapes, sizes, etc) to make the design cohesive and balanced
3. **Alignment**
All elements should have a locational relationship to each other (lined-up)
Directs the flow and direction of the user's focus
4. **Proximity**
Groups similar components for clearer definitions
"Blocks" of ideas make a more interesting layout and will more likely hold the users attention
